

DECOTEC INNOVATION WITH TENSION FABRIC

LSAV's tension-fabric system, DecoTec, is a high-impact solution that creates customized staging and scenic elements for live events. DecoTec's multipurpose material and hardware capture virtually any shape, size, or unique feature in order to creatively build scenic pieces and showcase a client's brand at the same time.

EVENT SIGNAGE

DecoTec is the perfect solution to creatively get your brand in front of your audience. The tension-fabric material has endless printing abilities and can accommodate any large-format design. DecoTec can be used for general session signage, overhead circular signage, trade show booth signage, and more.

SCENIC ELEMENTS

We transform our clients' visions into spatial masterpieces with DecoTec. The easy-to-construct hard-ware system creates custom-built walls, backdrops, sets, and other scenic pieces. The tension-fabric material is easily stretched and lights up beautifully for optimal audience visibility and enhanced creative looks.

PROJECTION & SCREENS

DecoTec can be used as an alternative to standard front-projection video screens. The lightweight hardware system can work as borderless screens, delay screens, circular screens, and more, and can be used for video and projection mapping.

EVENT TYPES

Our DecoTec system can be implemented into the staging, scenic, and branding aspects of any live event. Whether you have a large corporate convention, small meeting, tradeshow, gala, or other special production, DecoTec has the functionality to seamlessly deliver a fresh, innovative, and sleek look every time.

ECO-FRIENDLY ASPECTS

DecoTec is easy on the environment. The tension-fabric and hardware system is washable, reusable, recyclable, and entirely made up of aluminum. We feel good about our carbon footprint every time we use DecoTec.

OVERALL

DecoTec's printing and branding options are endless. Whether you use DecoTec as event signage, scenic elements, or both, DecoTec is the perfect solution to keep your brand at the forefront of your event and get the look and feel that you envision across to your audience.
